Thread: [Convos Bugged on Older Phone](#)

Effexion - April 28, 2020, 3:44 am

My phone and laptop are broken so I'm working from a 5" Android. I know this won't be a priority but I'm sure that others will be in the same boat.

Dorrance - April 28, 2020, 4:50 am

The admins are aware of these issues, Omni posted a thread below about it.

Have you tried updating the Google Webview? You mentioned that you're using an older device. There are some issues like Dorrance pointed out but Convo and Notifications are both working on Android.

Notifications aren't loading and the send button isn't working on convos.

Any errors on this page?

Is Convo working on other devices for you?

No errors. I've tried on two phones and using desktop view.

Update:

Notifications were showing, now they're not.

Could it be the connection timing out?

No, man. My WiFi is pretty solid and everything else works fine.
