Thread: [C# CODING SERVICES | BOTS, SCRAPERS, CRACKERS, HOMEWORK | EXPERIENCED & VOUCHED](#)

Sickness - April 28, 2020, 6:44 am

Hi, I've been offering my services for free for a while [here](#), completed many requests successfully and now I'm ready to open my service.

Experienced on many things such as: Coding Homework

Bots

Scrapers

Crackers

Account Generators

Selenium

And many more...

Portfolio of programs: [serpTracker](#) - Application made for SEO Agencys, can scrap google, make reports for websites...

[websiteReporter](#) - Able to report websites on multiple forms, and remove them from Google Search Index.

SubwayUK Cracker

[BoostJuice.com.au Cracker](#)

Steam Account Generator

Phone Number Scraper - This was really difficult as the site had captcha and customer didn't want to spend money on them, we created a script and used AI to solve the captcha. [We didn't use capMonster]

Bitcoin Talk Account Generator

Giftcard Generator for Private site.

Reddit Account Creator

Envato & ThemeForest cracker

Spotify Account Creator

Gleam.io Solver

Nitro Sniper

more...

He managed to code a SerpTracker for me in the past and I still do deals with him on-site. Good luck with your service, mate. As I couldn't resist posting in your thread. :)

(May 3, 2020 02:43 PM)mrknol Wrote: [\[CITE\]](#) I requested Sickness to develop a scraper for me. The scraper was really difficult to make since it had to solve a captcha at every request the program made.

He was able to implement an AI to the scraper which solved the captchas for free of charger.

Despite all these challenges, he was able to finish the program and it ran smoothly with no error or bugs.

Huge vouch to Sickness's service!!

Could you by any chance code a simple bot for CSGOEmpire?

Just need to check the chat, and notify every time there's a "rain".

You mean a bot that uses Instagram accounts to Post comments? PM me on private with instructions and budget, but I'm busy already with 3 projects, it will take some time to build yours if we do the deal.

I am interested in your phone number scraper, what does it base its collection on? URL lists, keyword lists or both? Or something else? How much is it? Do you have screenshots/video i can

see?

It is made for albanian numbers now but it can be changed to work with all regions, you just input a start phone number and a end phone, it generates those and checks on a website that gives the data.

Stanley - December 24, 2020, 1:17 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
