Has anyone tried It?

Like maybe getting traffic posting videos of a girl dancing shaking her ass, then move to snap/Kik

(Sorry my english not good)

Yes. Every smart person is doing this. There is a specific audio clip you use for the maximum amount of views.

on tiktok their are the same audio clips everyone uses that starts a trend, generally these audios all have pretty alike videos

and the videos I mean the trend of the video some people someone doing a certain thing to a certain audio and other people tend to recreate it either through blatantly doing the exact same thing or something similar with their own twist

The idea of using tiktok isn't to get traffic from other sites. You get traffic with tiktok by creating

tiktoks of your ewhore and growing your tiktok like that. Then, you redirect your fan base on your tiktok to another platform such as your snapchat where you actually do the selling. There are plenty of pedophiles and horny men on tiktok just looking at girls making tiktoks. It's easy.
