Thread: [free bitcoin mining rat?](#)

Relay - April 28, 2020, 4:34 pm

Hello, I am new to this whole R.A.T thing.. I have Been doing smaller hacking ordeals for about 3 years now, but decided to give this a try.

I remember a few years ago many of my friends were using people they infected for bitcoin mining. If this still holds true, I would like to know what is in the market today for this type of thing.

What is the best free R.A.T that can be used for bitcoin slave mining? also, what is the best free R.A.T in general? Thanks in advance.

With a RAT you can execute whatever file you want. It may be easier just to find a stable free RAT without that feature and a separate bitcoin miner. Then you install the RAT on the client PC and execute the miner remotely.

Any rat can work for this, You just need to use a good miner.

where are the good miners? and then you have to encrypt those too?

Futureman - May 12, 2020, 11:00 am

Bitcoin mining on non ASIC`s is nearly useles.
Go with XMR.
