You have discord? care to share?

wtf - April 30, 2020, 9:54 am

I would recommend checking this users UID before dealing with him.

kiet - April 30, 2020, 10:01 am

I can't pm but can you add me on discord?

kiet - April 30, 2020, 11:47 am

I took contact when I needed a project done, and no less than 20 minutes they took contact. Everything was dealt with precision even though I can be very unclear at times. No words than that they're the very best at their job.

I recommend this 100%.

I paid someone to do me a custom website, and after paying him he didn't send the files, he's not answering at all. The website he did is already up, it's just a simple landing page and an admin template, I need someone to copy exact what he did so I can upload it on my server. It's not much work, I already did HTRACK but it needs a few functions done, it's a shop basically so I need to be able to add/remove products, a few others. Could you send me a discord tag?

TheAnon.hf - May 8, 2020, 9:26 am

sorry we do only backend we are not specialized in HTML or CSS!

Ombra - May 11, 2020, 12:36 pm

I have hired TheAnon to review a source code I own. The code wasn't fully working when I delivered it and needed some fixes.

The code that was given me back did not only contain all the fixes I requested, but it also came with several improvements and optimizations that I have been patiently explained. I can't be more satisfied for the product I received and I believe every penny I paid has been well spent.

Thanks, really. I can recommend this coding service and I will surely come back when needed. ?

i don't talk about that your price is high i'm talking about your low quality for your style of answering peoples.
