I feel this is the appropriate place to write about your guys opinion on which is the best service and why>

znc - April 29, 2020, 1:08 am

lol amazon music definitely isn't comparable, if anything it's Spotify vs Apple Music.

Anyway, apple music is my #1.

Ease of use, love the UI, has every song I can ask for, I can get music online that isn't on Apple Music and sync it to apple music easy af from my pc, etc

The rest Spotify.

i have an echo but it links to apple to but its onlyl 3\$ for amazon on echo only. just i already pay for apple music for my iphone so id have to get full amazon music

Nadisty - April 29, 2020, 3:57 am

Apple Music. Trying to upload your own songs in Spotify is a joke.

SaintJimmy - April 29, 2020, 3:59 am

I had been using Samsung Music for a while. I don't have an iPhone, so I have never used Apple Music. But I did yes Amazon Music for a while. A huge no. Pathetic downloading quality and the audio even at highest settings is just as good as the data saver settings on spotify. I switched to Spotify Premium earlier this month and it has been worth every penny.

wouldn't make any sense not to upload your music on Spotify. Also most if not all Distributors support all platforms, so you can just upload them on all platforms at the same time.

I mean local files. Not distribution. Theres platforms out there that do it for you.

Amazon Music has come along way than what it was for sure. I gave it a try since I have Prime and they gave me a discount.

Demize - April 30, 2020, 11:51 am

I use Apple Music because it's included with my phone bill

packofmidgets - April 30, 2020, 11:52 am

personally I would not go with either of those two. I would stick with pandora just because they have great playlist.

Target™ - April 30, 2020, 11:53 am

Same, I don't like apple music spotify or any of that junk. Mostly pandora one has been my thing for 8+ years.

Stepdad - April 30, 2020, 12:01 pm

Apple Music is incredible, the integration to all Apple operating systems is what sold me.

Lindros - April 30, 2020, 1:26 pm

I have amazon music and like it. I also use Soundcloud or Youtube if a song isn't on Amazon, but it usually is.

The Apple ecosystem is the way to go!

I just got an iPhone and it made me switch from spotify to apple music. Even when I had free spotify.

Wonder how long before I get a mac.

VIXV - April 30, 2020, 1:30 pm

Between apple and amazon music, I'd have to go with Spotify.

It wont be long. I got my iPhone 11, Macbook, and Apple TV within weeks of each other. The AirPlay is so nice.

Aedan_ - April 30, 2020, 2:11 pm

Soundcloud is always the move. between the two though, I'll pick Apple.

de_g3ntl3m4n - April 30, 2020, 3:54 pm

To be honest id rather go and use spotify to be honest never really was into apple and never really thought amazon music was a thing i feel like it good for movies and prducts
but spotify man its the way to be hahahah

Lyrics synced in real-time like on iOS.. It's lovely.

I haven't yet! Will be sure to check it out tonight.

zruby - May 7, 2020, 7:48 pm

To be completely honest, I use neither.

The thing about spotify is that it has the largest library these days. Even the newer artists are starting to sponsor their albums on Spotify. You can see advertisements about it all the time on Instagram.

Vibe - May 7, 2020, 8:09 pm

I use Apple Music exclusively, I've actually never tried amazon music though, even though I have it.

havent been on instagram for a while but really? hahah i mean there competition for the moment is apple music but i have to say i love spotify a little more cause i feel like its more easier to use if you are trying to embed in a way and i feel like its more free then apple music. but hey you think the reason a lot of artist are moving to spotifty cause spotify is paying top artists?

knowledge - May 8, 2020, 2:45 am

apple music man

it's simple and does the job

Lil Wolf - May 8, 2020, 5:10 am

Bro Apple Music out the 2 Amaon just like there video service is lacking in content majorly its not as big as the other providers as far as content
