Thread: [Interest Check - Valorant Cheat](#)

QRK_ - April 29, 2020, 1:33 am

Aimbot and Wallhack

Maybe some exploits if we can get those done

Anyone would be interested? Pricing?

Yesterday - April 29, 2020, 7:10 am

Interested in the wallhacks depending on pricing

Hero - April 29, 2020, 7:11 am

Not at all. These will be detected all the time. Riot is just too good for that and their AC is too invasive or whatever you call it.

I would love if you proof me wrong, but until then, its a no from me dawg.

Thank you anyways bro!

Valorant is the new up and coming game. If you can make a decent cheat in the market before others and market it correctly you'll make bank. Sadly there's always going to be an interest to cheat.

Jay - April 29, 2020, 7:13 am

If you can make one that is actually somewhat decent and undetected, you can price this VERY high... but the chances of you making one that isn't undetected with Riot's ac is like impossible

Been on the 5th day of testings, playing super legit in some accounts, going a bit obvious on some others, didn't get a ban yet but I'll keep testing as a beta before thinking about a release. ATM I'm also working on a built in hwid spoofer for it.

Something they haven't added yet but said they would would be multiple positions for the same player at the same time or the player only loading when he's visible, that would prob kill the WH but from now on, nope
