Looks interesting - Does this work with multiple accounts at once?

Yes, You can load them line by line, and then control them in groups or individually. Once logged in it stores the session, useragent, proxy, etc to reduce locks and bans. It even supports in app code verification for those trying to grow their personal accounts.

Check out the video :)

Transxhunt - April 29, 2020, 6:28 am

I am really interested, however could you answer this for me.

Can I view stories of a page followers? Like there's this X page with 300k followers, or can i view story of their followers and engage with them, all automated?

Like If some one has put up question Poll in their story, can I answer "Follow for follow"

I hope you are getting what I am trying to say.

Yes, that is exactly the flow I demonstrate in the video. I use Ibex to scrape and autoimport realtime into Ibis which automates the mass story viewing accross all active accounts in the database.

Sorry, I just went through the video now.

I can see we can scrape users of a certain page and then view stories of the followers however, can we engage with the story? Like if someone has a question Poll can I say, Follow for follow.

Or just message the story viewer, Hey Saw your profile blah blah and blah

All through this tool?

It engages by viewing it, so your accounts show up in their feed getting you safe follows back/profile views to get traffic to bios/links. I will be adding more modules/actions as needed. This is a great base for anything we want :)

Blissed - April 29, 2020, 4:51 pm

How many stories can the bot view on one account in an hour?

Master - April 29, 2020, 8:56 pm

Honestly as fast as your proxies will allow. I found a rate limit bypass for this.

To clarify: this uses raw networking no emulators, no bullshit.

Stanley - May 3, 2020, 1:13 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Instagram Ibis updated to 1.1.9:

- Fixed issues preventing some login attempts.
- Confirmed all Functions Working.

Working and Available on <https://stormobservers.com>
