You don't have to "share" your list. You can just upload the contacts and start sending to them.

You will need to provide your own

DoomsRay - May 21, 2020, 3:06 pm

how is inboxing with this service?

timothylove - May 21, 2020, 5:29 pm

So we have to provide our own smtp ?
What exactly are you selling then.

Is it just a program like ultimatemailer / turbomailer ? Because if yes then it doesnt make sense for
a pay per email kind of price plan
I do 100k+ emails per month.

contact me on telegram @speedyeth and provide me the details. I might be intrested

I was interested until I read you need to provide your own SMTP server. Regardless does the mail
hit inbox or junk or spam and can you show proof.
