Hi.

Since one guy bought a 2gbps spoofed server on spackhost.com but he started to be a fugging asshole i just banned him and took his money, now im giving for free this 2gbps server LOL

He said everywhere im a scammer but brah, my customers is not saying the same, also have a discord server with 100+ customers on it lmao, no one will trust ur shit account and ur shit post with caps lock activated, also i have my own colocation with router access so BRAH ur a boomer

Just send me a discord msg and i will give u the server, i don't care who will be, i will give it to THE FIRST ONE.

Bye kid, you may have had a beautiful server right now, but you've been a jerk RIP.

Can you show us his disabled port on the switch so I know you're not an idiot capping about having colo'd hardware when he's really reselling some shit-tier Eastern European garbage?

You're a liar and an idiot. Sorry to break it to you.
