Thread: [anyone doing gta 5 money drop?](#)

Mom - April 30, 2020, 7:40 am

Read the title, just wondering if anyone is doing these nowadays, if so, dm me if you have a good and reasonable price that's not overly expensive, I'm bored because of this quarantine and want to play GTA 5 but I realized I have no money, so if someone could help me out and do a money drop for me for pretty cheap lmk, looking to get around 250m-500m (would rather prefer anything around the 500m range).

Thanks. Don't waste my time either, thanks!

Just get a free menu lol. Paid drops are a ripoff.

Where at? I've always been looking for a menu that doesn't have any viruses/rats n shit, do you know of any that are reliable, and still working? And paid menus as well, I'm always looking for those as well but I can't seem to find anything reliable, I always second guess shit after I install a menu and end up deleting it and not running it just because of my past experiences with security. So if you can find me a paid menu that's legit and actually worth using and has good recovery options and shit like that, PM me :)!

Can you join these money drop lobbies on console? Or is this strictly aimed towards pc?

PC. I already bought a menu anyways, so I got as much money and levels as I want.

Wish I would have saw this thread before you bought one. Look up Kiddions Modest Menu.
