Thread: [Best places to buy bitcoin?](#)

Armani24 - April 30, 2020, 8:51 pm

So what are some reliable places to buy bitcoin without like a million factors to verify and with some relatively low fees.

Cash app if your in the US is what I use - not that much verification

Here on site but you pay 10-15% - no verification

Bisq - also does no verification

My friend has a verified cash app and I can swear it's the lowest fee I have ever seen like buying \$40 BTC I have to pay \$42 cash app. He always buys it for me and I give him some extra money regardless im saving.

I've completed exchanges for

1:1, on other forums I assume this would be the same.

It's honestly just people I randomly know through my personal network

BruteForce ? - May 1, 2020, 10:24 am

I personally use paxful, since you have so many options. You can buy BTC on there with almost any payment method. The only downside to it is that the fees are high at times.

Vitriol - May 1, 2020, 12:08 pm

Exchanging with people on forums isnt bad , you got to find the right person though if you dont want to be paying crazy middleman fees everytime

BruteForce ? - May 1, 2020, 10:48 pm

I forgot to mention, if you want to use Paxful, yes, you can avoid verification however, that leads to the fees being 3x as high.
