Good for you OP, you think you do not care but ur just really shy : D

humanbody - May 1, 2020, 10:57 am

That's called being a shy and not that you "don't find any interest" in those things.

Let's start from girls. I guarantee you if a chick gets naked u gonna bang it 100% and you'll be even more interested and you can't wait, it's same like when you wait for your ketamine dealer to come and you are so impatient.

You're depressed, not smart.

my perceived shyness comes from disgust felt toward life and human kind

i do not care really though! thats the worst part.

you feel like after taking heavy drugs for long azz time and then suddenly putting them away

total emptiness

(ofc i didnt take drugs)
but thats how i feel

Are you okay? I read some of your posts and sometimes worry for you. I hope you're well.

Overconfidence much @OP?

Don't you know the rule.

No matter how hard you work or how smart you get, there will always be an asian guy to beat you to it.

Go to the store and get a 12 pack. Make money on the Internet, sanitize, and work out. You'll start feeling different. I think this quarantine shit is getting to everybodies head lol

RushEm - May 1, 2020, 2:51 pm

Honestly, the way you post I can't tell if you're just being ignorant or actually being serious. If you are serious I'd recommend you talk to a counselor to help clear your mind and to help you through the problems you are facing. It really does wonders and gives you a chance to talk to someone one on one for issues such as the ones listed.

ProfessorEevee - May 1, 2020, 3:21 pm

I mean, I don't understand how you've linked intelligence to not finding anything interesting. If you were to ask me, I'd just say you're boring. I mean, if you were really smart you'd spend this time learning and putting that knowledge to use. Instead of "complaining" about how smart you are. Imao

Sprinkle - May 1, 2020, 3:38 pm

I'm not sure this is something to brag about. I would say that the ability to control rather than just "turn off" would be more worth bragging

Acting like a robot is not smart. It is fucking dumb.

How do I know? I feel the same.

Games? No.
Friends? No.
Girls? No.
Family? No.
Memes? No.
Trust? Nobody.
Act? Like a robot.
Feel? Like a zombie.
Money? The only purpose.

I understand why you think it is smart because logically speaking that's the best way to go. Not letting feelings have an impact on your decision can turn you into a superhuman. A robot is the best at things, and what is the main attribute of a robot? Besides, well, computing power (duh) it also feels nothing.

But do you wanna know the truth? It is fucking dumb, and it is gonna bite you back.

I as well focused on turning my emotions off and auto brainwashing myself into thinking everything above is for the better.

Wanna know how that worked out?

It ended up in countless hours of psychiatric help, countless pills for countless issues, and almost suicide. Where did that go? No-fucking-where. I took countless pills and spent countless hours in therapy for nothing because nothing is working.

Why? Because I did it for years from such a young age that it influenced my whole life.

You'll never understand how powerful your brain actually is and how much every little decision you make in your life will change the way you think, especially when you're young.

I turned from a happy kid that was gaming all day long with his friends and going out to have fun to a fucking asexual anti-social that is hating his own birthday which is trying to find himself.

Don't be fucking stupid, be a human not a robot.
