Man, I listened to the entire audio and one small voice in the audio really fucked with me. It was something that would impact even veteran police or military most likely. A small voice in the background. Man it is damned sad.. This was the result of a parent feeding their kid cyanide laced and drugged flavour-aid (koolaid knockoff).

It's around 36:41 approximately in the background. I'd actually recommend not listening if you don't wish to feel bad.

Pretty fucked up event all around. There is a lot of disturbing things in the audio but nothing made me feel anything like that did.

I remember watching a video around this event. Oh my God. So crazy to thing this actually happened. People can be so blind and fanatic sometimes.
