Thread: [Best Way to Grow a Instagram Niche Acc?](#)

Expheience - May 3, 2020, 7:10 am

What do you guys think is the best software, method to build a monetized Instagram account eventually?

I was thinking of using Jarvee and just going from there slowly doing shoutouts and CPA offers eventually or actual product offers for my niche.

a11s - May 3, 2020, 7:22 am

Jarvee and slowly growing is a great idea.

You can also go for the mother/child method.

What's that method?

Short: Have one main account which you want to grow and other 50-100+ accounts that promote the first account.

Very long way of doing it but yeah using other accounts to promote your own. Also just posting on popular posts with clickbait lol I find that works a fair amount

Dorrance - May 3, 2020, 7:51 am

Click bait and joining a stat group to increase your profile

Theocritus - May 3, 2020, 9:31 am

jarvee is a good automation tool. could maybe utilize zapier as well for certain things. post consistently, utilize hashtags, and research

How do you manage them all?

a11s - May 3, 2020, 10:16 am

You automate them as you'd do with the main one.

Posts, comments, DMs, stories, everything using bots and proxies. The child accounts don't need as much attention as the main one, in fact, they don't really need attention at all.

Just set up, schedule 50-60 scraped photos, set up the number of follow/unfollow/likes/DMs/stories, and then it's just set and forget.

Good, Jarvee will be used to configure this all?

Toosii - May 3, 2020, 10:19 am

Buying shoutouts from BIG pages who have the same niche as you will help.

MadGoofyHF - May 3, 2020, 10:20 am

I suggest you to use a bot like Jarvee and SLOWLY watch stories, add people, and so on, on your targeter keywords

a11s - May 3, 2020, 10:23 am

Jarvee should be a great choice.

I quit IG for some time so I don't really know what's the best tool to use right now, but Jarvee should be okay.

Just make sure your settings are low and your proxies are good.

IG is really hard these days from what I hear, especially for botting.

de_g3ntl3m4n - May 3, 2020, 10:29 am

I mean you can always just do it manually in a way no need for software and stuff instagram itself already has a chill automative system where you can upload whenever you say you want to

The Don - May 3, 2020, 2:03 pm

I found influencers are the best way to grow an Instagram, also ad's work as well.
