Thread: [OSRS Gold Farming or Account Selling?](#)

DeltaNumaris - May 4, 2020, 10:55 pm

Hello everyone. So I am back into playing OSRS, however, at the moment my intention is to turn my Gaming Effort into Profit.

So I have considered Gold Mining and selling at \$0.60/M

No matter which approach I take this is the Goal... So I began Farming and with Enchant 1 I was able to make about 120K / Hour... Not much and with 10 hour days it adds up to be 1.2M...

30 Days / Month is 36M which adds up to be less than \$30 / Month with the fact you need to pay \$10 / Membership...

Than there's High Alching which can earn you close to 1M / Hour.

I haven't done much of this, as the common profits have more demand than supply, and the higher paying profit makers cost a ton of money for about 3M Profit.

I have decided to leave High Alching as a "Maybe"...

But at the moment I am building an Account to sell for OSRS GP...

I am level 36 Strength/30 Attack/30 Defense/40 Mining

I intend to be 99/Strength/45 Attack/45 Defense/75 Mining with Obby Mauler...

What do you guys think? Train an account or Gold Farming?

What are you asking for? Are you tryna bot or „farm“ by hand?

Nobody is going to give you free hints that will make you hundreds of millions of GP a month. It

depends on the research and practice you do. The possibilities are endless.

Also we cant answer for you if you should do accounts or gold. Its all about your preference and why not try both?

I would be doing it by hand... but good point...

I will work mostly on accounts and a bit on Gold Farming.

Farming gold with bots and vps would be highly profitable. I don't any fast ways for account reselling. And I think it's more time consuming.
