Thread: [Looking for a web developer to build me a video site](#)

SIM-4668883 - May 5, 2020, 10:37 am

Hi all,

I'm looking for somebody to build me a video based website, can't be on wix or anywhere that could delete it for breaking t&c.

Only I need to be able to upload videos but the process can't be too complex.

Also I'd like a chat room page just as an alternative to discord, therefore it would need to allow several hundred users preferrably without a large monthly cost for the chatroom alone. If this is unrealistic, i'd also be happy with a video site and a forum.

I'm not sure what the best platform is for this type of project bearing in mind I'm not comfortable with back end development.

Happy to pay a deposit via mm due to account age. You can contact me here or on discord:
