Thread: [Selling a 10khits.com Account with 4.6m points](#)

akamit - May 5, 2020, 12:00 pm

Selling a 10khits.com account with 4,600,000+ points for \$200 in BTC

1 point is equivalent to a 10-second hit.

I'm selling the account very cheap.

To buy 4.6m points from 10khits, it will cost \$312+

So if you even buy with my price tag (\$200) then you'll be profiting \$112+

Anyway, I'm flexible, offers are welcome.

Looking for quick sale!

traffic generated from it will be from Proxy IP or residential IP?

I'm not sure about it, as there is no mention of it as far I know.

This is an auto traffic exchange, so maybe some people run the viewer from their own home PC and some people run on VPS/RDP.

Now you can figure out what IPs it could be...

Some traffic bots to make you understand the difference.

1. Diabolic Traffic Bot
 2. Traffic Demon
 3. Traffic Exploder
 4. Traffic Spirit
 5. Jingling
- and so on...

Anyway, thanks for your input.

I'd just like to inform you that, I haven't hide anything about what I'm selling - everything is transparent.

I just hope that whoever buys the account knows what he/she is buying and from my end I'll be transparent as always...
