Hey guys!

I'm selling these projects, you'll receive 100% ownership, the code, the program, website, everything.

1 - CarFax Bot - BIN: £150 - C/O: £100

This program identifies any vehicle using the VIN. You can buy CarFax reports for usually \$40 per, but this program gets the reports for free. This is a Discord bot and works perfectly. Admin commands and member commands with a subscription system. Comes with the website too!

2 - AIOChecker - BIN: £100 - C/O: £25

This program checks usernames on: GitHub, Instagram, LastFM, SoundCloud, Spotify, Steam, Twitter & More! Proxyless! You load your wordlist in usernames.txt and you check them! I've gotten many OG usernames using this, this tool has been sold more then 20 times, and has made me about \$200 so far without barely any advertisement.

If you're willing to buy multiple, I can do a big discount for you. HMU! I can show proof for every program! All of these programs are private and ready to be sold.

3 - GCManiac - BIN: £100 - C/O: £0

This program checks gift cards on multiple platforms! Proxyless, very easy to use. Currently supports 8 modules, has a module creator, config + backend system, HWID locked, result capture. I've gotten thousands of working gift cards from this tool.

I can show proof! Middleman Accepted

this prick , atm using discord TrapStar#6954 is scamming, so don't buy any shit from him
he ripped me off with his carfax script

after receiving the payment, he changed the pass to the account that he was using it in script
