Can vouch for PerfectAim. I've been a member for over 2 years. PA cheats are one if not the best cheats in regards to security. The rust cheat has been UD since as long as I can remember. If you are going to cheat and don't want to get banned you should use PA for sure!

Invites are not guaranteed. An invite is earned by being active and contributing positively to our forums. Helping users in their specific VIP area with any issues they may encounter, answering pre-sale questions, or just overall involvement within the community. Within the last few months, there have been changes made to our invite system, I would suggest checking it out! If you have any questions, do not hesitate to PM me :)

Kind regards

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

The rust cheat being invite only has allowed it to stay undetected for a incredibly long time, I'd say that's a reasonable trade off. You can go buy a public rust cheat if you want but at best you will last a couple weeks and then end up hwid banned, personally that doesn't interest me.

Well that's a way to answer a question, perhaps you haven't slept yet? He asked why advertise the Rust hack if it's not available n' you know damn well people ain't gettin' an invite.

Although the cheat is invite-only, as you'll see from the original post it is specifically under the 'Trending' games that we support. Though difficult to obtain an invite, it is not impossible therefore worth advertising. I appreciate you for reaching out, and if there are any other questions I can answer feel free to reply here or contact me via PM!

Whoever signs up on our forums has the exact same chance of receiving an invite as each other - however, it is up to each user how they utilize their time on our forums. It's based on your activity and proving that we can trust said users with our invite-only products. Does it take a while? Absolutely. I'm always 100% honest and transparent - it's a timely process. But the benefits dramatically outweigh the cons.

If you are looking for something easily obtainable to the masses, then we simply are not the provider for you

Which is the cheapest way for me to get invite to Rust cheat?

1. Hire some bitch to suck your dick
2. Hire a pajeet to simp and do support on your forums for a month
3. Straight cash

Let me know

p m - May 24, 2020, 9:21 pm

I used to be very active on there, but everything became invite which it should be, don't want stuff to get out of hand and detected. I was on the path to get invited and gold badge but I never did, oh well

D474 - May 24, 2020, 9:25 pm

Perfect aim is waste of time. you're never gonna get invited xD

wraxu - May 27, 2020, 6:59 am

Still invite only for Rust... Wtf

BigTaste - May 31, 2020, 4:38 pm

Perfect Aim is a fantastic sight for cheats with a very friendly and helpful community. I have only purchased one cheat from there so far and let me just say I have never had a better one. The cheats they provide are very stable and of superb quality. I would HIGHLY recommend anyone curious to head on over and just check the sight out, read around the forums and get an idea of what the community is like with your own eyes.

Just a heads up. Several of the cheats are invite only, this means that you must be recognized as a trusted individual among the community, there is no way you can buy an invite, you must be selected. This helps keep the cheats undetected as there are far less people with access to them. If you want to be invited, just be yourself and really get involved with the community on the forums and discord. However, there are plenty of other cheats that are not invite only and they are fantastic.

Cheers!

Scottyj01 - May 31, 2020, 6:55 pm

Man would love to check out that Smite cheat shame it's invite only but understandable. Will def check out the CS:GO hack.

Hello there,
Since I'm fixing my pc but soon,
I may be interested in your product!

CuCumba - June 5, 2020, 3:34 am

I wasted my money purchasing cheats for games I don't play for an "invite" to one of the other cheats. Waste of time. You are better off buying a public cheat because either way, cheating is cheating. You risk ban on any platform regardless.

I would like to see the person hacking live and for there to be proof that this hack can go a month + undetected. I don't see any worth of providing real life identity to something I will probably never get invited to anyways but on the low possibility I do, I want the hack to at least be viable for that effort.
