Thread: [Russian private HVNC source code.](#)

Ledabsolute - May 7, 2020, 12:04 pm

I found it in the private section of Exploit.IN.
It's an HVNC with panel.

I followed the tutorial inside the folder, and compiled both the files (client, and server). Plus, I edited the .INI file with my configuration. I even already installed correctly the panel.

Now, I don't know how to let it run. I don't know the structure.

Please, someone can make a full tutorial about the use of this tool?

Due too many leechers, without any help; to get the download link, contact me by Private-Message.
Else,

Telegram: @SymmetriesReturn.

XMPP: symmetries@exploit.im.

Thanks in advance,

Best regards.

in which language is it coded in?

Just knotted the source is out

Good job on leaking private stuff.

Ah, you already banned there for scam. Nevermind then :)

0x0000h - May 10, 2020, 5:34 pm

it's not even private lmao
that's half-fixed tiny nuke :)
