Thread: [\[FREE\] RAT assistance service](#)

**GhostHunterLad** - May 8, 2020, 4:59 am

Seen a few other people doing it so I decided to help out.

I have 3.5 years experience with remote administration software and can answer many questions that many people face when they first get into it.

I can answer questions from:

- [\*]Crypting
- [\*]Choosing a RAT that is best suited for YOUR needs
- [\*]Spreading
- [\*]Maintaining stability
- [\*]Port forwarding
- [\*]Staying safe & secure
- [\*]Keeping good FUD rate
- [\*]Monetising (earning money)

So if you're having issues with any of the above, contact me.

CompanyStore#9080  
bensotense@xmpp.jp [OTR]  
t.me / bensobenny

Still online to help ANYONE with ANYTHING RAT related.

**raghavsood999** - May 9, 2020, 5:09 pm

I need a good stable native RAT which can be encrypted using code protector. I have life time version of the code protector software.

So the native RAT must have option to download from source code or official website. I can compile from source c++ or delphi or VB. However, it must be reverse connection NOT direct connection. I want the clients to connect back to me. It just needs a easy to use file manager and can have a process manager, remote desktop with mouse clicks and live desktop capture not a still one. Im not talking about HVNC. OZONE RAT had it. Warzone rat is good. I am looking for a free rat and free download.

**VisualSoft** - May 9, 2020, 5:22 pm

why are you looking to use native rat with a managed crypter?

better you use a managed rat.

**raghavsood999** - May 9, 2020, 5:35 pm

What managed RAT do you recommend? I need a good native RAT with USB spreading feature (.ink new method) ALSO I USE code protector. I am not getting FUD using vanilla RAT which is free on github and the server is not even FUD. Code protector has FSG but everytime results are UNFUD

**VisualSoft** - May 9, 2020, 5:39 pm

What is FSG?

if vanilla Rat is scantime detected after crypting, Its an Problem from the crypter and not from the Rat.

i would suggest quasar rat to you.

**raghavsood999** - May 9, 2020, 5:40 pm

Quasar RAT is not NATIVE and requires .NET 4.0 dependency. If i install server.exe on remote pc, will i need .net over there or it will run without dependency?

**VisualSoft** - May 9, 2020, 6:03 pm

(May 9, 2020 05:40 PM)raghavsood999 Wrote: [\[CITE\]](#) Quasar RAT is not NATIVE and requires .NET 4.0 dependency. If i install server.exe on remote pc, will i need .net over there or it will run without dependency?

windows 7 to win 10 have .Net 4.0

if you are looking to rat xp or 98 then its your call.

Also i repeat again: The crypter you are using looks like managed Crypter (.Net crypter), So combination of Native + .net = .net

**GhostHunterLad** - May 9, 2020, 6:31 pm

^ this sorry for the late reply. some IRL stuff happened so I couldn't get to my PC.

Online.

**raghavsood999** - May 9, 2020, 7:39 pm

I need a native free rat I don't have money at the moment so I can use code protector on it and crypt it with FUD detection.

I need 0/33 FUD RAT. Must have file manager at least and doesn't need to be managed rat. What is .anaged rat mean?

What's a good native rat with official website and download link?

Instead of using a crypter, I thought I can use a hex editor or file splitter to FUD my RAT server which is only 13kb. Do you think it will be run time fud if I had edit?

Also I need a hacking hex editor and one hex editor made by a hacking group and a free file splitter made by a hack group not free file splitter. I think hex work shop is made by an antivirus group and it's their 3rd party software so when I modify exe it gets uploaded. Also free file splitter also made by another security company but they hidden. So I need free hex edit program and file splitter which can split file into 1 in each then 5 bytes from 1 KB. I also need a good free multi av runtime and scan time scanner or source code for a multi av scanner.

**Staizy** - May 9, 2020, 9:37 pm

Contact you via XMPP, thanks dude :)

**GhostHunterLad** - May 9, 2020, 9:39 pm

DarkTrack is free, native and has a working file manager, and 9/10 rats don't have a website unless its paid.

And just use a crypter is worth it in the long run.

(May 9, 2020 09:39 PM)GhostHunterLad Wrote: [\[CITE\]](#) DarkTrack is free, native and has a working file manager, and 9/10 rats don't have a website unless its paid.

As for a scanner I recommend cyberscan

**raghavsood999** - May 9, 2020, 9:56 pm

I need to code my own runtime and scan time scanner with multi av scanner but it must be offline and coded in c++ or VB

Do you know if it's possible to download AV programs and extract scanners from them and make a scanner without being spied by AV software ?

**VisualSoft** - May 10, 2020, 6:27 am

Why dont you contact other scanners owner, they can guide you in the right way.

**21118169** - May 11, 2020, 1:24 pm

This dude helped me a lot, thanks man

**Jordi** - May 11, 2020, 2:32 pm

How can I get an android rat FUD? How can I find it?  
Is metasploit better than a rat?

**GhostHunterLad** - May 11, 2020, 2:43 pm

(May 11, 2020 02:32 PM)Jordi Wrote: [\[CITE\]](#) How can I get an android rat FUD? How can I find it?

There are such things as android RAT cryptors but they're pretty scarce.

**7** - May 12, 2020, 3:23 am

Glad your offering this service for free.  
I hope it goes well for you. It's not what I am offering. I am offering full training one to one.

But good luck and hope they dont waste too much of your time

**Rainbowisgod** - May 12, 2020, 1:32 pm

PMed you on discord would really love some help.

**GhostHunterLad** - May 13, 2020, 4:56 pm

Thanks and I'm pretty bored nowadays so its something todo I guess.  
GLWS btw

Online and replying to ALL.

**7** - May 13, 2020, 4:57 pm

Good if anyone wants pre-advise ill send them to you. Im too busy with doing work for that

**GhostHunterLad** - May 14, 2020, 4:08 pm

setup my keylogger  
Yes just send me a message :)

**multicognition** - May 18, 2020, 12:35 pm

Your discord tag doesnt seem to work, check my recent thread ?

**moorbes** - May 18, 2020, 5:26 pm

Wrote to the OP for everything I needed related for RATs and he was straight replying. Great helo  
and really needed some guidance. Vouch.

**SIM-4725719** - May 25, 2020, 7:44 am

Your discord isn't workign

**RAT GOD** - May 27, 2020, 5:40 pm

Greetings Mr HQ member of HF!

What can you tell me about spreading? Do you have any unsaturated methods I can perhaps pay for? :]

**VisualSoft** - May 27, 2020, 5:48 pm

Rat god is looking for a spreading method?  
never expected this form you.

I'm always looking for methods, as everyone should be. One solid method can make you a millionaire overnight.

**ramsesh** - July 20, 2021, 4:40 pm

I need to send a doc or pdf or a image file to the client to install the RAT on the PC. There is also a Antivirus installed on the PC. And maybe a FireWall.

Then i need to download some files from the PC and get some Passwords. I need to be undetected for 2 weeks.

Is this possible ?

**hazbot77** - July 20, 2021, 7:03 pm

Is this possible ?

The doc and PDF file are very possible, but the image file isn't and hasn't been possible for a long time. You will need an exploit kit and possibly a crypter for this.
