Thread: [G++ reduce output file size](#)

SIM-3149568 - May 8, 2020, 7:22 am

Hi, is there any methods to reduce compiled output size? I used -Os parameter and #pragma once every header.

I want to know there is more method to reduce more size

Tafelpoot - May 8, 2020, 9:22 am

WIN32_LEAN_AND_MEAN and only include headers that are absolutely necessary.

You can include every header file known to man but it won't compile it into the exe unless you use that functionality.
