Thread: [Tips in Monetizing Facebook Page \(Ad-Breaks Enabled\)](#)

redking - May 8, 2020, 10:25 pm

guys,

i was recently approved for in stream ad breaks in my facebook page and I uploaded a 3minutes longer video and it was already earning but i find it hard to find other videos that dont have any danger of copyright material, heck i even downloaded a youtube video and edit it as much as i can but when i upload it, jukinmedia and viralhog already claimed a part of the video for earnings, that sucks.

do you have any methods of reuploading viral worthy videos without the danger of copyright or violation?

niche: funny videos

followers: 12k

Find some YouTuber who's not massive who uploads funny gameplay moments & just steal a video from them.

I have a Facebook network of over 8 million. If you're wanting some cheap promos on your ad-break videos, send me a PM.
