Thread: [Dragon Ball Z: Kakarot - Goku vs Beerus - Game Play](#)

Xerotic - May 9, 2020, 2:44 am

Back when [Dragon Ball Z: Kakarot](#) in January I played through the game a couple times. It's very enjoyable! You play as your favorite characters from the show and you follow the Dragon Ball Z story arc. You start off with the Saiyan invasion on Earth, move on to Frieza, Cell, and even Buu. All along the way there is side content as well.

Anyway... recently they released their first DLC. The DLC is the beginning of Dragon Ball Super... Beerus and Whis. The DLC has you train to a Super Saiyan God so that you are able to battle against Beerus. Even once you reach the requisite level 250 (max level) the battle is still considerably difficult. I've won it a few times now... so I decided to record one for fun.

Check out this super close match between me (Goku) and Beerus:

What do you think?

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Funny enough was speaking to my brother in law about getting this at dinner tonight.

apart from the damage splatters, it looks as good as the older ones i played.

When I got everything set as I'd like to have it, this is the first game I'm purchasing when buying the PS4 (or PS5).

I loved the Tenkaichi series, especially the third and to be fair, a real Dragon Ball fan since the very first.. this is a must have for me.

What I love (heard / seen so far) is that they didn't update anything new as in the Xenoverse series with new characters, but they did it from the original Dragon Ball series up to Super, including GT if I'm right. Looking forward to game some more again!

Is this the very first Dragon Ball game you played? I highly recommend the Dragon Ball Legends for mobile (iOS and Android).
