Thread: [Dummy script for services \(eg web design/programming/social media agency](#)

tzbb - May 9, 2020, 3:13 am

I need a business presentation website and i don't have time to do it.

Wordpress with some random theme and content already there for a dummy services business website would be enough.

I need one of these or all together if you have something already done: programming, web design or social media marketing (not selling followers etc, something like a social media agency)

Im offering \$50

[contract=tid]Start Contract[/contract]
