Thread: [RUST in MINECRAFT | Custom Coded | Released Soon!](#)

Shrooms - May 9, 2020, 3:53 pm

DevastMC

This server has been in the making for over 2 years, and we are so close to releasing this to the world.

Welcome to Rust, in Minecraft.

Discord: hs9JHHB

[Video: <https://www.youtube.com/watch?v=uwccsNsqN8E>]

Features:

Bradley (Custom coded TANK)
Custom Gun System
Custom Gather system (Ores and Trees that spawn randomly)
Custom Loot System
All Monuments are built
Radiation Zones
Custom Group System
Tool Cupboard (Claiming System)
Upgrade System
Custom Raiding System
And
SO MUCH MORE

This has all been custom coded and worked on by dedicated members in our community.

Hope to see you soon!

Louiz - May 11, 2020, 5:11 am

This looks awesome! What version is this on?

brawrrrski - May 11, 2020, 5:55 am

I don't personally play minecraft but I have quite a few friends that do. Ill share them the video! But as an avid rust player myself, this looks pretty cool! I can definitely tell the work that went into this. Quite the accomplishment!

If you ever need any ideas or have questions you want to run by me to ensure a true resemblance of rust, feel free to PM me :)

Thank you, a lot has gone into this over the past two years and there's so much more in the game not shown in the video. I appreciate you sharing the video thanks man.

Most of our staff have been playing Rust for a long time too so we know most of it, but thanks for offering some help. Feel free to join our discord and suggest some things ?
