Thread: >> [\[\\$50 Copies\] 100% OFF UNLIMITED - Domains, SSL's, Emails, 10 GB Storage, Bandwidth](#)

Sprinkle - May 9, 2020, 10:52 pm

A new type of method to HackForums

I have a method here to obtain unlimited amounts of the following

- Free Domain (Private Registration)
- Free SSL Certificate
- Free 5 Professionally Branded Emails
- Free 70 Directory SEO Scan
- Free 10 GB Storage with Unlimited Bandwidth
- Free Business Plan Coordinator Tools

The profitability here is completely Through The Roof. We all know just how beneficial a surplus of domains can be, whether you use them for forwarding, future sales, or to start a venture of your own.. not to mention the other services also included in this method

Now this is slightly public knowledge (but still difficult to figure out). Then again, isn't every method to a certain extent; the true depth is within figuring it out urgently and performing correctly with experienced support.. I think this is just me being more overtly honest then I need to. Not to mention with my expertise I would be able to show you how to utilize this as many times as you would like, answer any questions you may have, and help you execute the entire process

Selling 10 copies only

Price: \$50

Notes:

- This does not take any longer than 10 minutes to execute
- This is not Blackhat in any way

This method is simplistic to perform, and absolutely foolproof. The lower price tag is in regard to the "unknown closure date". We simply do not know how long this method will operate. I do guarantee that you will be able to register unlimited domains; and unless the method is patched very urgently after purchase, I will deem that you had enough time to take advantage of the offer. It is important to note that I do not see this being closed any time soon

That would definitely be a great example for a high need of this method. The capability of these domains and more is pretty high and I am glad you acknowledge that. I will definitely consider you as the vouch

I can leave a detailed review & show proof the method works. :)

I've received a vouch copy from Sprinkle, he went over with me briefly how to do the method. It is really simple and you truly can have a domain, SSL cert, etc within 10 minutes for FREE. He explained it to me well and I understood everything. The only thing I will say is... you need a card/PayPal with at least \$1 on it, but you won't get charged until the next billing period (which you can cancel). He said the method may be a bit public but honestly I haven't heard of it anywhere. Also only downside is that the method will stop working after a few months. You won't be charged at all unless you plan on keeping the domains for longer than 365 days.

All in all, the method is worth the money. It also really doesn't need an ebook, he personally walked me through it (which I respect more), but he has told me he's thinking of making it into an ebook soon. If you're into domain flipping this could honestly be really profitable for you. You can easily get 20-30+ domains a day for free, and they can be easily re-sold or transferred.

Thank you for taking the time to evaluate this method and observe its true profitability. With the downtime each of us have now, it could easily be utilized to acquired unlimited domains with SSL certificates installed ;)

James Burnham - May 10, 2020, 4:17 pm

Hello, is there any vouch copy available?

Free along with SSL and 5 email addresses for a year yes; then you would have to renew. But this 365 window gives you the time to evaluate whether or not your business is at a standpoint with renew (without the initial \$100+ investment), not to mention you can snag domains and resell them for alternative purposes before the 365 window is open. I plan on making base price \$50-\$100 of this method because of those circumstances

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
