Don't deal with this person, I messaged him on telegram and asked offered my service, Basically he wants to retrieve data from online casinos.

I showed him a video proof of an SQLi vulnerability of one the sites he had given, the video also shows dozens of personal data.

He asked me for a bulk transaction of at least 10,000 rows, I immediately asked him to start a contract on HF, he said no need for that.

He and his "team" will verify the data and send me the payment after the verification process, 10,000 users is a lot to run away with.

Deal with Caution, Maybe he is Chinese since he can chat in Mandarin or so.
And I just found out he's a multi.
