Thread: [Contract Template Feature Suggestion](#)

spiral - May 11, 2020, 1:18 pm

I was wondering if it would be possible to add an option for vendors to apply in their contract templates to disable the template if they don't login to HF for a certain amount of days, I think this should be an optional feature as some vendors may not need to actively come on site for their products to be delivered, but for some (including myself) if I didn't come on site for a few days I wouldn't want users paying me if I wouldn't be able to deliver.

I feel like it would be a good feature to add for vendors who worry that they may become MIA at random points, and don't want to take customers money and not deliver the product in a timely manner if something has come up and they can't come online for a set amount of time. Would also be beneficial for the vendor as they would most likely get an open dispute, and negative b-rating if they were away for sometime.

I don't see how this has been a problem where we need to adjust.

Seems really pointless. If you're gonna go MIA just self ban.
