Vouch Copy Review

OP provided me with the vouch copy and here is my review.

OP shared the link to the software and it is command-line based where it accepts video id and Http proxy list file as the parameter. I ran the bot on multiple videos and it didn't work for me.

Bot execution window:

Spoiler [\(Click to View\)](#)

Before and after running the bot:

Spoiler [\(Click to View\)](#)

OP provided me with the proxy list to try with but still had no success, I even tried grabbing some Http proxies from my own but failed to gain views.

I have messaged OP with the findings, he probably will revert back with his say.

If OP manages to make this work as he claims with few enhancements, this bot would be worth every penny!

EDIT

I misread it to be a youtube video BOT instead of a view bot, my bad OP. I tried it on a few of the videos and it definitely works.

I sorted the newly streaming videos with lowkey views. I tested with few proxy list from a few of the sites and they worked great! The OP even provides a list so you can use the same or scrape your proxies by yourself.

Before running the bot:

Spoiler [\(Click to View\)](#)

After running the bot:

Spoiler [\(Click to View\)](#)

I would just suggest OP to include a ReadMe file which will help the non-tech guys to understand the working and the usage of the tool.

Overall review: A must buy for the ones who are looking to rank their videos. Also, the tool comes with lifetime support, all included, dirt cheap!

are they stable

Are viewers stable, and does it get stream suspended for spam after hours. And does it do

playbacks
