Thread: [RAT that is either Free, or 1 time Lifetime payment + FUD Encrypter](#)

SchlomoShekelberg - May 12, 2020, 2:12 pm

If there a RAT here that is free, or is one time lifetime payment? Like Dark Comet? But up to date

Hello, you should look at async Rat with updated stub, or go to the market and buy a premium rat with lifetime plan (very hard to find or high price for shitty programs).

I notice all of them are like \$100/year or \$30/month, but not a single one so far has a lifetime option. AT this point I'm just better off with Metasploit, and a life time crypter

I agree with you, in my opinion the most worth is to pay a programmer to make you a custom rat but it have a high price.

Just use NyanCat opensource RAT altho no idea why someone would like to RAT on a Windows machine, anyway if you are up to get up and running something realiable go for Nyan's source else pickup some github open-source malware like Nyan's and start learning to code and improve your overall "hacking" by doing something useful + worthwhile and ultimately it will benefit your perception of what you can do with your ideas, like omg I want to RAT to do money, once you code you're like "omg ima get a real job.." once you get your job please come back and laugh at yourself for looking up for pre-compiled stuff you barely know what it does on the background...

LEARN LEARN LEARN!!

and

LEARN

ALSO I ADVICE YOU TO JUST FUCKING GET EMPIRE AND A LINUX VPS, LEARN TO USE IT ON YOUR OWN COMPUTER FIRST WITH A VIRTUALMACHINE AND YOU JUST GOT A BOTNET MYFRIEND!

PM me please, (I can't PM yet) ££

Chameleon - May 23, 2020, 10:34 am

There are loads of R.A.Ts for free on here, I would test them all honestly and see which one is best for you

NyanRAT is good imo
