Thread: [Best Encryption to encrypt VB.NET code?](#)

Krysis - May 13, 2020, 5:42 am

Hello.

I've been very desperate to find a great free encryption tool, to encrypt a software made within VB.NET. This is legal software, so it's not any kind of virus.

I want to encrypt EVERYTHING within the application; the code, the strings, values, etc.
But of course, it should not be detected as a virus!

If you have any suggestions, feel free to reply! It would be awesome if someone came with suggestions.

Thanks! ?

VisualSoft - May 13, 2020, 7:07 am

You can use any free encryption and that should get your work done.

Example : xor

xHeaven - May 13, 2020, 7:19 am

You are looking for an obfuscator.

If you are looking for free options, check out ConfuserEx, if paid, then NetGuard.io.

make your code hard to understand + use modded version of ConfuserEx ;)
