Thread: [Help needed on using Putty.exe](#)

Kaveri123 - May 13, 2020, 12:35 pm

Hi All!

I have seen in many exploits esp Word Exploits that they put the url link <https://the.earth.li/~sgtatham/putty/latest/w64/putty.exe>. Please let me know what is this link and what is its significance? Will there be any payload in this link? If so, how to upload the payload? Will there be any specific link for particular payload? or Will there be specific link for a particular IP address?

I would be grateful if any one on this Forum can elaborate on this?

Putty is just an SSH client

Kaveri123 - May 13, 2020, 12:41 pm

Yes! how to use it in Exploits.

Yes! How to use it in Exploits?

Dude he literally answered your question. It's just an SSH client. Google what an SSH client is. It's not a 1337 hacking tool that automatically drops payloads on ip addresses or whatever you're talking about.

I have one good FUD Word Exploit. I dont know how to use it. When I saw some videos on Youtube, I saw that in some videos , direct download link is used and some videos Putty is used. Thats why I asked this question.

You need Putty to SSH into your VPS which is a Virtual Private Server. Or alternativelt you can do ssh your_default_username@your_VPS_ip_addressss (the default username is most commonly

root)
