GATeR Bustabit Script

I bring to you the very same script that I used to recover 15K bits. It is safe and slow, just like it is mentioned in the thread title.

~ Plans ~

150 Bits - Just the script | NO SUPPORT

200 Bits - Script | 1-time initial support

350 Bits - Script | 10-day Support

FAQ

Q. How much does it cost?

A. See Plans above

Q. Why is the script so cheap?

A. I am not like others claiming to make \$30 or \$300 everyday without busting. Script can NEVER be 100% fail-proof but it can be 99% SAFE. And that's what I am offering.

Q. Any vouch copies?

A. It's only 150 bits. Do you come that cheap?

Q. But we need testimonials!

A. For the first 5 persons, I can provide the script at 50 bits.

Q. Payment Method?

A. Tips on BustaBit - because that way I will be able to provide support too.

I was so addicted to gambling at one point that I started investing my savings too. Obviously I made money but like the end of every gambler, I lost quite a lot. I started doing online-jobs for users on Bustabit and they would tip me for it. I would use them for running this recovery script simultaneously on 2 accounts because it was slow.

After I made enough to exit this hole, I never looked back. So be patient and not TOO greedy because it is what kills you.

You can see how MUCH I was involved in using Bustabit going by the size of withdrawals, in short. I know what I am offering you here.

~Simulations~

I will be running simulations for this script everyday and post the starting and ending balance starting from today. So that everyone may see it.

Today the starting balance is 15000 bits and it has been ~30 minutes.

Paid 50 bits for his script, and it does work. Made about 1k bits in a few hours. Very safe script! Always remember that its gambling, so you can bust at any time. OP has been great to work with and is very responsive on discord.
