Thread: [View photos on private instagram?](#)

robertrosenberg3 - May 14, 2020, 6:55 am

Hello guys,

Is possible to view photos on the private instagram profile?

I saw scams and troll videos on youtube about fake applications, but nothing usefull.

Is this posible? Somebody said u can create similar profile of someone who is already following that user, but I dont wanna do it... Is there another method?

SpookyD - May 14, 2020, 7:31 am

Basically you follow them.

Now seriously, yes you can, but you need to login trough the script for private accounts. basically you don't view them, you download them, but this can be serves as the same.

<https://instaloader.github.io/basic-usage.html>

You don't need to be a programmer for that matter, i don't know nothing about Python and was able to run it with no problems.

I believe you have to actually be following them to do this though no?

In their FAQ they never mention you must be following them, but i haven't tried, i used it a few months ago as a content scraper for some project i had in IG.

But i remembered it was mentioned there, so i guess its worth a try.

I will never understand why someone will make a video damn well knowing the method doesn't work. Seriously, blows my mind ?

Z0mbie - May 19, 2020, 10:33 am

I tried this myself didnt seem to work

might be possible

I guess I understand that, but I just think you are probably a not so great individual if you are creating fake videos and spreading false hope to those who are actively seeking REAL solutions. ?
spread the love
