Thread: [Major news for the ratting scene and the future of ratting](#)

Stargazer - May 14, 2020, 10:43 am

Hello ratting section of HF.

I bring you news filled with blessing and hope!

My name is Stargazer. A quick sum up of me - I was a hacker/ratter for a long time. Many years. Everyday all day. I know the potential you have to RAT Windows PC's. I think it's the best and most fun way to hack someone (using a RAT) and gives you all you need and more at the click of your mouse. I have a great mind for ratting and am very familiar with the scene/how things work/what people are trying to do/what they need.

I'm going to move us forward! I'm planning on hiring the BEST coders I can possibly find to develop the shizen we need. Like RAT's for example. Imagine an extremely advanced, brand new, next-level coded RAT. That will be my first goal to get coded.

How and why am I going to do this? I'm rich. There's your answer. If I told you how rich, you would not believe me unless you knew who I was.

Do you guys remember KFC Watermelon? The coder of LuminosityLink? How great that RAT was for us. The keylogger, file searcher, rev proxy, etc. Well, I've already pledged to reimburse KFC the money the feds stole from him when they convicted him. I'm just trying to get your attention right now, this thread is quite a big deal. Feel free to +rep me for doing that for KFC also.

I don't talk shit I mean what I say. I love ratting, I know there needs to be better guides, it needs to be more organised, we need real blackhat money making methods that work. We need a blackhat community that WORK! That contribute. I will get more into this another time

I will be giving back to the hacking scene. Not just in ratting. But anything. My name is Stargazer. Pleased to be acquainted with you. Feel free to ask me anything. I'm sure if you're intelligent and open minded enough you will take interest.

By the way, I'm not just going to go to freelancer.com and find the "best" coders I can... I will be able to reach out to pretty much the real best coders. I have a lot of money and I will be able to contact relevant people.

Cheers! ?

Is this Armada or Alex Buckland?

3xploit - May 14, 2020, 3:06 pm

Sounds cool, but I don't think that you're telling the truth.

elliott666 - May 14, 2020, 3:53 pm

Sounds cool iv'e also just returned into rat's and im absolutely needy for a new perfectly coded rat

like (blackshades or nanocore) Wish you Luck with your project!?

surenhohn - May 14, 2020, 4:26 pm

There is no future. Deal with it

Fire_Star - May 15, 2020, 5:05 am

Taking it with a pinch of salt.

QU?CKSILVER - May 16, 2020, 4:18 pm

Quit with the blackhat ?hit please.

'Cynical - May 16, 2020, 4:21 pm

Blackhat activity is uncool and RATs aren't allowed here! (I think? I haven't been active on here in a few years, but I know DDoSing and such has been disallowed)

However, if you're looking for a developer, shoot me a PM with your discord.

Is this a troll comment or something? RATs are allowed. This is a section called Remote Administration Tools.

Luc1d - May 19, 2020, 6:50 pm

This sounds cool but is probably fake news

opsplayer - May 20, 2020, 11:11 am

Lol in case this takes off im early asf lol.

Like the above users mentioned though blackhat activity is not allowed i believe.

took the words out of my mouth

If your planning to commit a crime I shouldn't need to tell you that a federally monitored forum isn't the place. Also what is your deal, you have an ego the size of the goddamn moon! who the hell are you to come out of nowhere and act like some bigshot all time hacker.

He is probably just talking shits. If I have all that he is claiming to be I wouldn't even bother to right that here. Indeed he is good copywriter. That's all.

For anyone who doesn't know, it's illegal for them to say they know who I am. I am currently classified information. This kid knows who I am and is trolling.
