Earth Towny server will be releasing this Friday (5/22). It will feature a completely item-based economy (gold ingots), controlled exclusively by the players. No shops, no auctions, just players and items.

There is currently ~1 week left in our Skyblock giveaway for cash/discord nitro/ranks/etc.

All servers except for the Earth Towny Survival server are going to be undergoing major revisions and therefor will be down for a while. Anyone is still welcome to come play with our growing Earth player base during this time however.

We added custom recipes for many items that are not obtainable on the Earth map.
