This isn't a Hack Forums ebook. This is a 100+ page, well-written, value-packed book. It includes every detail of how I went from 0 followers to 1,000,000 followers in 2 years on Instagram and then how I turned that into an income source that is only getting larger and larger - currently producing \$20k+ a month in gross profit. What's more, I show you exactly how I am making my Instagram business mostly passive so I can live my dream of travelling whilst working from my phone just a few hours a week once lockdown is over. Of course, you will need to apply the steps in this ebook and work hard at it for a while. However, the rewards are most certainly worth it.

Design:

One of the best designed ebook I ever read. It got a nice looking front page, table of content, images and mind mapping.

As well as the layout of the content is simply amazing. I was impressed by the icons you used as well as the 'cartoons' and screenshots. It's easy to read and understand, no secrets hidden away as everything is explained clearly. Great job with this!

Content:

There are 100+ pages full of content, tips, resources and much more. The content isn't just a simplified way of Instagram money making like you are used to or how others are promoting it, such as; "Make an account, post a lot and sell shout outs".

No! This ebook contents a very detailed way of explaining things, in a story-like readable way. I do have to say that I never saw an ebook about Instagram that involved other high valued tips such as expanding business, using Social Media ads (including pictures, audience targeting and more) and of course many others things which I will not reveal in this review.

Quality:

You should know by now that I am very enthusiastic when it comes to this ebook in particular. I'm experienced in Social Media Marketing, SEO, CPA, Sales and even had my own advice agency for

small businesses for a while, and I can't stress enough how much quality content is provided inside of this ebook. Tips, resources, screenshots of 'how to' do certain things. Examples of good posts and bad posts, colour usage and much, much more! I do not get paid nor any 'bonus' to write this review, it is simply a promise I made after getting the ebook for just \$17 BTC. Best investment for Instagram so far. Literally.

Price:

I hope for everyone that Ivex will not follow up my advice to increase the ebook price with a lot. As I told him I would make this ebook and information pack, including support for \$75 or even higher! He told me that he rather overdelivered, so clients and customers would be happy with his product and increase his engagement with those who bought it. This is one of the most humble and qualitative things I seen in a business man with this much opportunity. Take advantage of the \$17 BTC price, as I would price it much higher for all the content that this ebook contains.

Overall:

I can't stress enough how great this investment was for me, personally. Although I'm experienced in this field, I learned a lot by reading this 100+ paged ebook for only \$17 BTC. The design is great, the content is mind blowing and the tips, resources and other 'extra' things are too good to ignore. I highly recommend anybody that would doubt to buy this ebook, to spend the \$17 on this ebook as it is one of the best things you will ever buy on HF in the form of just an ebook.

Thank you for the great chat on Discord, and of course all the tips. Good luck with the sales!

(Nov 25, 2020 04:59 AM)theparallax Wrote: [\[CITE\]](#) Just purchased the book a few hours ago and have read through the first 50 pages (skimmed through some of the advanced stuff to see what comes up towards the end) and I am seriously impressed. The book is extremely well written and the content is up to date and extremely relevant to what I was looking for. I've invested in ebooks on various forums before and usually for topics like IG I tend to expect semi saturated methods, outdated tutorials and general filler content, with some gems here and there, but this was much different.

Right away I was able to see how nice of an account the author manages as well as how he was able to research the niche, create the content and grow the account. While reading the book I kept going back and forth doing my own research and was inspired to create an entirely new account from scratch and I am extremely excited. I finally feel like the things I was unsure about and confused on before are all contained within the book and were well worth the investment of \$17.

I am excited to have started this account from scratch, not buying another account and staying away from automaton tools I have researched in the past on my road to 10k and beyond. While there are some great tools like Jarvee available out there, with all the api calls and IG cracking down on them, I'll use the money to invest in my account in other ways mentioned within the book!

I don't want to go too in-depth on what he described but I am extremely impressed and found exactly what I was looking for to build and grow a profitable Instagram page. Thank you!

(Feb 23, 2021 04:08 PM)Cyam Wrote: [\[CITE\]](#) This is one of the best investments I've made. Most

realistic and most detailed e-Book I've ever read and best of all, it comes from guy who REALLY knows what he's doing. I'm currently at 200+ followers on my Instagram themed page after 7-10 days. I've already learned more about how to build Instagram pages in this week than I've known my entire life. This is literally all thanks to knowledge I gained from reading this 130+ page e-Book.

I'm so grateful to Ivex for writing this and offering on HF. Otherwise I would never find it and I would never try to run an Instagram page. I feel like this will truly work as I'm already gaining a lot of followers and people enjoy my content.

(Apr 13, 2021 02:57 PM)Cyam Wrote: [\[CITE\]](#) Update on my review.

I've been doing Instagram ever since I've bought Ivex's method. I actually managed to get one account to 1.3k in just under a month, but I found myself doing it for the sole purpose of making money so about week ago I dropped the project as I didn't find motivation to continue. However, I didn't want to quit Instagram all together, because I learned SO MUCH from Ivex's e-Book I couldn't simply let it go.

On 9th of April I created another theme page, this time out of passion instead of money and I'm seeing some CRAZY results.

Check my proof below. This is literally growth in 3 days and keep in mind I'm seeing new followers every minute.

WARNING: BIG PICTURE [\(Click to View\)](#)

Unfortunately, I don't have any picture proof of it being in 3 days, but you will have to trust me on that. Keep in mind I knew jack shit about Instagram before reading his e-Book and here I am getting 400 organic followers in 3 days (more like 2 days since last 300 followers are from today only). I didn't buy any shoutouts or did any ads whatsoever - this is 100% organic.

I'm hyped to see more results and I'd like to thank [Ivex](#) for like a 4-5th time for creating such a quality e-Book.

I just realised when I did start making money, it was worth investing to scale faster.

When I achieve 10k+ a month consistently from IG for 6+ months I'll probably work on a much longer video course and then package this ebook in it as a free bonus, at a much higher price. The site is actually modelled on a competitor who uses ClickFunnels as I didn't know much about sales when I released this originally to my IG audience. I'll consider ClickFunnels when I modify the upsell on the product to a subscription model. But I'm definitely planning on improving the funnel.

I bought the guide, looking to build a personal account honestly not even necessarily monetize it. Definitely looking forward to the read; it's very well written through the first 10 pages...

Quick question -- unrelated to your guide -- I found a username that I want, that is currently not active. I see this when I access it from /<insert name>

However, I can't claim the name (if I tried to set my username to it). Is it because it's banned or something? Is there a form on Instagram I can put a request in to potentially unlock it for me?

Just purchased the book a few hours ago and have read through the first 50 pages (skimmed through some of the advanced stuff to see what comes up towards the end) and I am seriously impressed. The book is extremely well written and the content is up to date and extremely relevant to what I was looking for. I've invested in ebooks on various forums before and usually for topics like IG I tend to expect semi saturated methods, outdated tutorials and general filler content, with some gems here and there, but this was much different.

Right away I was able to see how nice of an account the author manages as well as how he was able to research the niche, create the content and grow the account. While reading the book I kept going back and forth doing my own research and was inspired to create an entirely new account from scratch and I am extremely excited. I finally feel like the things I was unsure about and confused on before are all contained within the book and were well worth the investment of \$17.

I am excited to have started this account from scratch, not buying another account and staying away from automaton tools I have researched in the past on my road to 10k and beyond. While there are some great tools like Jarvee available out there, with all the api calls and IG cracking down on them, I'll use the money to invest in my account in other ways mentioned within the book!

I don't want to go too in-depth on what he described but I am extremely impressed and found exactly what I was looking for to build and grow a profitable Instagram page. Thank you!

This is one of the best investments I've made. Most realistic and most detailed e-Book I've ever read and best of all, it comes from guy who REALLY knows what he's doing. I'm currently at 200+ followers on my Instagram themed page after 7-10 days. I've already learned more about how to build Instagram pages in this week than I've known my entire life. This is literally all thanks to knowledge I gained from reading this 130+ page e-Book.

I'm so grateful to Ivex for writing this and offering on HF. Otherwise I would never find it and I would never try to run an Instagram page. I feel like this will truly work as I'm already gaining a lot of followers and people enjoy my content.

Sky is the limit, thank you Steven <3

Update on my review.

I've been doing Instagram ever since I've bought Ivex's method. I actually managed to get one account to 1.3k in just under a month, but I found myself doing it for the sole purpose of making money so about week ago I dropped the project as I didn't find motivation to continue. However, I didn't want to quit Instagram all together, because I learned SO MUCH from Ivex's e-Book I couldn't simply let it go.

On 9th of April I created another theme page, this time out of passion instead of money and I'm seeing some CRAZY results.

Check my proof below. This is literally growth in 3 days and keep in mind I'm seeing new followers every minute.

WARNING: BIG PICTURE [\(Click to View\)](#)

Unfortunately, I don't have any picture proof of it being in 3 days, but you will have to trust me on that. Keep in mind I knew jack shit about Instagram before reading his e-Book and here I am getting 400 organic followers in 3 days (more like 2 days since last 300 followers are from today only). I didn't buy any shoutouts or did any ads whatsoever - this is 100% organic.

I'm hyped to see more results and I'd like to thank [Ivex](#) for like a 4-5th time for creating such a quality e-Book.

Hey, I purchased your book because it doesn't promise that you'd make 99999999\$/second like the other paid methods here on HF. "long term rapid growth" is a contradiction.

An ecommerce brand is one of the hardest to grow.

Why?

Because why would a non-customer follow the brand?

If you want to build a successful ecommerce Instagram page that brings in sales rather than simply captures existing customers then you need to:

- a) be funny/creative with the content
- b) define the identity of your brand so you can connect with people the share the identity (be polarising)
- c) have fast support on the IG

If you can do all that, then yes the tips in the ebook will help

Any of this utilize bots/botting for followers/likes? I see on your page you have the like count off on every type of 'branded/sponsored' post & <10K likes on ~1 million follows on other non sponsored posts so just wanted to know.

Avg likes is 9,000 according to socialblade(excluding reels which is much higher). This is very, very good for the size of my page in my niche.

I understand why people think the growth could be fake as celebrities can get insanely good ER even with millions of followers. But with a business theme page, people tend to follow 100,200,300 similar pages so the engagement gets a bit more diluted. 1% is our target ER and would put us in the top echelon of our niche above the 1m follower range.

You can also use an audit software like HypeAuditor if you don't believe me

EDIT: I hide ad likes because they usually are between 1000 and 3000 so I'd rather not display it. Obviously ads get less engagement because they're ads and usually not viral content, but for viral ads I show likes

Also here's some proof of the backend analytics: <https://i.imgur.com/ybwg0el.mp4>

I am wondering if the branding option with the IG Bible is worth it in your opinion. What have others experienced with it if they bought it? I already messaged this on the conversations, but I never got an answer.

Hello, can I discuss alternative methods of payment with you?

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Do I need to invest (money wise) beyond the \$17 in BTC, or do I need to have a certain skills (such as design) to work with the methods in the book?

I'm very interested.

Thanks.
