Thread: [Information in "my bio box" from staff](#)

Aklimczak522 - May 17, 2020, 5:08 am

Hello

As you can see in my profile, I got information "Don't use staff's avatar.", as few months ago, when I created HF account, I picked random avatar, and I didn't know it was staff's only avatar. Staff then deleted my avatar, and left this information in my bio box. I wonder now how can I delete this information, as seems I cannot delete it for myself. After I try to edit my bio, it just adds additional information. For now I have 2 informations: "test", added by me to check if I can delete information from staff, and one from staff obviously. Now I know what avatar I should avoid, but information about not using staff's avatar stays now for surely more than 6 months. I guess only staff can delete this information, so I would appreciate this help if it's possible, thanks

@edit also worth mentioning, avatar I used was from HF library

To find it easier and for context; OP used an avatar from the "Novica Poker" avatar pack.

Exactly, thank you for mentioning

[Eagle 95](#) I'm pretty sure that was your avatar right?

webdev77 - May 17, 2020, 7:59 am

[Aklimczak522](#) The text you are referring to was in your signature block. I cleared it for you. You can set it to whatever you would like by going to <https://hackforums.net/usercp.php?action=editsig>

Damn! I can't believe none of us who tried helping him on his other thread didn't realize that it's his signature and not his bio box. ?

(May 17, 2020 06:23 AM)Vitani Wrote: [\[CITE\]](#) [Eagle 95](#) I'm pretty sure that was your avatar right? Yeah that's what OP and a couple others said in his other thread I'm pretty sure.

Deany - May 17, 2020, 8:05 am

Good guy webdev saving teh day

OT: Don't use staff avatar etc in future OP

Aklimczak522 - May 17, 2020, 8:06 am

Thank you! Now I can see I really couldn't do anything with it alone, because when I try to edit signature I have got info to obtain 500 posts. Thanks again :)

Either way, I rarely issue a warning for that as it's a public library, just write in signature or usertitle so a member can see. :)
