I will be using this service again, and would recommend it to anyone wanting some good working proxys, it's very cheap too!

The API also works fine, although I haven't been able to test it out in Openbullet, I tried in my browser and it all worked, OP provides clear details on how to use it and it's very simple to use

Very good service and very good looking site, OP is friendly too ! I look forward to using the site again!

Nice service. Prices aren't too bad either. Might buy in the future. GLWS OP.

nCuX0 - May 18, 2020, 2:18 am

Ive got 5\$ coupon code of this service and i must say its worth the price. I used to pay 12\$ monthly for 100 proxies with unlimited bandwidth and here its only 5\$ for over 2000+(just http). Tested with twitch/youtube viewer bot.

Vouch, i will definitely buy subscription for this service.

???Berlin??? - May 18, 2020, 2:41 am

Great site for proxy scrapping at better rates you can get for! OP hit me with a beta access and I had the experience of testing his site and the website is HQ with great interface, with one click you can scrape those hq working proxies and most of them works fine.

It's an easy deal for someone who needs good proxies at cheaper price!!

Thanks for the beta access and GLWS

Got a vouch copy from pronouncer, yesterday when he was giving out free beta codes for a week. Started to test it out and joined the support discord server, there where a few bugs here and there but he was very quick to fix them normally in under 5 minutes, considering the panel was coded in under a few hours and the support is great this is definitely a great buy. I tested some of the proxies on cracking and was pleasantly surprised with a high CPM. The proxies are not 100% private but for someone that needs bulk proxies this is the way to go, you get proxies being delivered to you all

checked for functionality before you receive them so you don't have to check proxy lists of 100k+ just to end up with 500 working. I am looking forward to the update with private proxy purchases and rotating residential.

Overall a 10/10 Experience.

Rhinoo - May 18, 2020, 4:33 am

Just tested the site out. Runs very smooth, decent proxies for the price will keep using it for as long as needed. Clean and simple UI. Easy to use, great for beginners. Vouch Vouch Vouch

Can vouch for this service, I was a buyer for his old service (Proxy Scraper) but since he discontinued it he gave me access to his new service. Its great loads the proxies pretty fast giving options on what type and region of the proxies you want.

Want to give my honest opinion about this service so here we go!

From the start I like the simple web design, easy to follow and read. My only personal opinion would be to create a darkmode as I personally do not like bright white websites.

The actual usage of the proxies is really easy and great. A simple generate button and selection of what kind of proxies I wanted was straight forward.

They performed just as well as I thought they would, decent CPM on an account checker and no connection errors!

I most likely will end up extending my subscription/purchasing a sub sometime in the near future when I can actually get some money!

Pronouncer - May 18, 2020, 3:46 pm

Expect very minor downtime as we test out a new web host due to our current blocking out a lot of requests.

Just finished moving host, was a ballache but hopefully its for the better old host was giving me some shit, will keep an eye on it for the next 24 hours.

If you need good working proxies for a low price, this is a pretty good deal being offered here. I'd like to wish you luck on continued sales and keep up the good work.

Thank you for the review bud, we are adding private dedicated proxies today for sites such as instagram etc.

OP gave me a vouch copy for a 1 day trial.

Their service seems legit and is running.

Unfortunate circumstances made it so I couldn't get a proxy running. Some kind of problem with my token in combination with my zero experience in using proxy's.

Won't continue to try getting this one to work since I already found another provider, which was a little easier for me to understand.

Not trying to sales bash OP at all, support was extremely nice and responsive.

GL with the sales and I hope a lot of other people will continue using your proxy's!

Maybe in the future when I'm more used to using proxy's, I'll come back.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.
