Thread: [Bots wont load onto net](#)

kev1v2 - May 18, 2020, 9:50 am

Hey,

I've got this issue for a whole day and no one can figure it out but my bots wont load onto my botnet. It seems that there is an issue with my payload I think.

If someone wants to help me dm me on discord

It's a ssh list I scanned onto a qbot. But literally everything works except for the bots getting onto the qbot. I even get the sending commands message of said ip. So it should get onto my bot but it just wont. I'm not the brightest with botnets so that's why I'm asking help.

(May 18, 2020 10:23 AM)s???? Wrote: [\[CITE\]](#) Did you test your stub before spreading it? Is it runtime crypted?

Are you returning to a dedicated panel(http)? or another type of net?

It was a IoT Botnet (Mirai Variant) the issue was his server wasnt compiling the bins and when he ran the payload he was getting 404 errors as the bins were not on the server.

Oh I'm sorry if I came off as rude man, I was legitimately just trying to help.

Oh no! I didn't mean it like that really thank you.
