Thread: [\\$50 BTC Giveaway \[Upgraded Users\] \[Completed\]](#)

Rally the Bulls - May 18, 2020, 11:52 pm

Figured it's about time I give back to the community again. My investments have gone incredibly well the last month or two, and I'd like to spread the love.

Winner will be selected via RNG on 5/29/20. Only one entry per member. Post number will dictate your entry number. If the post selected is one of mine, a multi-poster, or any other unqualified user -- I will disregard and generate a new random number. Winner will be mentioned in thread and have 24 hours to claim their prize.

+Rep and post to enter. In your post, tell me something unique about yourself. Banned, exiled, or members with unresolved scam reports (on a case by case basis) are ineligible.

Good luck everyone. :)

****PLEASE NOTE:** Actual prize will consist of \$50 BTC, minus any fees. You'll likely receive closer to \$48-\$49. Thanks for understanding!

First Roll: <https://gyazo.com/373dde8dac6889fa5db29a45ce3e0544>

Due to being exiled at end of contest, this member will be disregarded:

Second Roll:

Winner:

Congratulations [Yin Yang](#) and thanks for participating, everyone!

I'll close thread once Yin Yang confirms here he has received his prize.

Already repped you in the past!

Something unique about me hmmph. I guess that I have found that I can suddenly wright and analyze texts for my English class, at an extremely higher level, with no extra prior practice. I know that's not very exciting, but for my own benefit and future careers, I am about to jump about 4 grades from what I got in secondary school (UK Equivalent to High School), which will put me at what is equal to roughly an A. So hopefully that will boost me just a little bit when looking for a job in the near future.

Private investments just paid off a 3x ROI.

Long term portfolio is temporarily up 25%

Been starting some day trades and swing trades this past week with a small account of \$500, up to \$780 currently.

Things are going good!

Thanks for the giveaway. I already repped you if that's alright. Congrats on your investments my man, always a good thing.

Something unique: While trying to make money and get in while the getting is really good, I love and study a lot about future technology and security. This includes technologies such as: AI and Deep Learning, programmable matter, solar panels and anti solar panels, quantum computers, gene editing and so forth. A lot of research is being done by the director of engineering at Google that predicted by the end of the decade we will be able to put a chip that connects at synapses between our dendrites and axons in our brain, and could "decode" the code in our brain and our entire bodies will be basically programmable at that point. <- that's some weird ish but these guys are really on to something lol

Oh sorry, ehm during the last few month i've been working on a custom crypto currency trading script for binance. It automatically places alternating flipping orders (buys low, sells higher). And so far it's doing alright. Druing the last two month i've made profit of a little more than 0.1 BTC (If you are interested in it, have a look at the threads where i documented my development and testing progress: <https://hackforums.net/showthread.php?tid=6020393> , <https://hackforums.net/showthread.php?tid=6020393>).

Hope that's qualifies as something "unique" :D
