Thread: [Option to Hide Awards](#)

Orchid - May 22, 2020, 6:37 am

Hello World!

I think there should be an option to hide individual awards for a byte fee. I just can't stand (especially on mobile) seeing 15% of my screen's real estate being dedicated to awards.

There could also be the option to hide other user's awards. If you decide to hide someone else's award maybe they could receive the byte fee (or a %)

Or: just a simple 'hide' / 'show' button. Thanks

Michael - May 22, 2020, 6:43 am

Users can already hide their awards for a byte fee.

<https://hackforums.net/showthread.php?tid=6047613>

Furthermore if you'd like to hide someone's awards, here's a guide (pc only though):

You can pay that user 1000 bytes to hide

Whoever pays 1000 bytes for a user to hide their awards is mentally not up to date.

Meh. If you really want someone to hide their awards I suppose you should be the one who pays for it.

That's what i meant. Either way, its stupid to do so.

Orchid - May 22, 2020, 8:31 am

I didn't know these features existed.

Use your browser to block this image...

https://hackforums.net/uploads/awards/award_sprite.png

And this CSS:
