Thread: [Footer misplaced, HUM-egg misses grayscale & _regex_title in Preview Post](#)

Exalted - May 22, 2020, 8:12 am

Here are three small UI bugs I found:

First, on the profile page, the footer element is placed within the content element though it shouldn't be. [\(Click to View\)](#)

Currently

Fixed

Second, when viewing a PM, your new post from Quick Reply, or a 'myawards.php'-page, the Hackuman-egg doesn't have the grayscale effect applied. [\(Click to View\)](#)

Private Message

Change Award Order

Post made without reload/redirect (Quick Reply)

Elsewhere

Third, when in 'Preview Post' mode hovering over your profile picture renders _regex_title [\(Click to View\)](#)

?

device - May 22, 2020, 12:15 pm

Never noticed the _regex_title.

Angela White - May 22, 2020, 12:16 pm

also throwing in there that whenever you create a new post, the greyscale of the HUM egg isn't applied and it looks like you earned a brand new egg from that post.

The almost expired green egg looks brand new when I create this post.

Exalted - May 22, 2020, 12:42 pm

I just noticed this, only if you use Quick Reply and you stay on that page w/o reload/redirect though.

Yeah it must only be for quick replies as I usually always click the actual "Post Reply" button and the egg is the shade it should be at the time.

Nachfolger - May 23, 2020, 7:50 am

Also adding on here, when a member joined "Today" the title for the date shows up as {0}. Click any one that joined today <https://hackforums.net/memberlist.php?sort=regdate>

Eg.

Spoiler ([Click to View](#))

Omniscient - May 23, 2020, 10:36 am

[Xerotic](#) can hopefully fix these Monday. Thank you for reporting. Minor bugs are often unnoticed until someone reports them. Keep'em coming.

Athr - May 23, 2020, 12:28 pm

Code highlighting (hl.js) does not work when previewing or quick editing the post.

Crypto Game webpage has the Marketplace Menu on the left for some reason.

<https://hackforums.net/cryptogame.php>

There are a bug in the Hide Awards option. When an award is removed (HUM egg for example). All the awards show up.

Athr - May 25, 2020, 9:17 am

Normal and L33T members trying to look at other user's byte history opens up their own byte history.

Ideally it should show the No Permissions page instead.

Exalted - May 25, 2020, 9:20 am

A small thing, on extras.php, it states that L33Ts are not able to view Trust Scan though they can.

(May 23, 2020 12:28 PM)Athr Wrote: ([CITE](#)) Code highlighting (hl.js) does not work when previewing or quick editing the post.

The code highlighting not working in preview mode is annoying as hell.

(May 25, 2020 09:17 AM)Athr Wrote: ([CITE](#)) Normal and L33T members trying to look at other user's byte history opens up their own history.

Ideally it should show the No Permissions page instead.

And this was quite annoying, noticed this too when I was L33T.

Yeah. Same with mentions. Should be an easy fix for Xerotic.

Exalted - May 26, 2020, 10:30 am

I don't feel like creating another thread, so I'll add it here:

The message sent by [mention=3583467] when receiving a Hackúman Egg:

Stanley Wrote: Congratulations, you've just been lucky enough to find the Hackúman Egg Emerald award. This award is randomly granted during a post randomly. The award may be hatched in the [Hackuman](#) game.

I have two observations. First, the word Hackúman in the URL has "u" instead of "ú", secondly, the word random appears two times in the second sentence, which is redundant.

Edit: The PM title has the same spelling mistake.

Eg.

Spoiler [\(Click to View\)](#)

It seems to be a problem with "Today" in general.

Hovering over "Today" in the welcome back string:

Hovering over "Today" on the lottery index and info page:

There are probably more places where this is happening.

Cooligan - June 6, 2020, 7:25 pm

(May 23, 2020 07:50 AM) Nachfolger Wrote: [\[CITE\]](#) Also adding on here, when a member joined "Today" the title for the date shows up as {0}. Click any one that joined today <https://hackforums.net/memberlist.php?sort=regdate>

Eg.

Spoiler [\(Click to View\)](#)

The same effect {1} will happen on Given Popularity pages as well as anywhere else on the forum where the the date indicator says either "Today" or "Yesterday". It's not either until the third day where it displays the actual date or a time within that first 23 hours where you can then hover and see everything down to the exact time. The only exceptions to times prior to "Today" and "Yesterday" is within the first 23 hours where upon hovering it will show ["Last updated x amount of time ago"](#) and will give you the date and time information.

A few examples:

Given Popularity pages:

(Time indicator: Today)

Spoiler [\(Click to View\)](#)

(Time indicator: Yesterday)

Spoiler [\(Click to View\)](#)

Bytes History pages:

(Time indicator: Today)

Spoiler [\(Click to View\)](#)

(Time indicator: Yesterday)

Spoiler [\(Click to View\)](#)

Lottery pages:

(Time indicator: Today)

Spoiler [\(Click to View\)](#)

(Time indicator: Yesterday)

Spoiler [\(Click to View\)](#)

And I'm sure the list goes on where either "Today" or "Yesterday" appears as a date indicator [instead of the actual date and time](#) or ["x amount of time ago"](#). Gonna tag you Xero [Xerotic](#) as I assume this is something you'd want to see.

Exalted - June 7, 2020, 4:33 am

Let's add this too, in the profile drop-down it says Comrades, and the same on profiles but in the Account/User CP it is called Buddy/Ignore List. This might be confusing.

Cooligan - June 7, 2020, 5:06 am

This has already been reported to Xero months ago back when the Comrades system was first introduced to replace the Buddy System.

For instance when you get a notification for a Comrade request, it will come up as "You have received a Buddy Request from ____"

Same with if you go to view your actual Comrades List, it will say Buddy List all over the page.

Exalted - July 19, 2020, 5:58 am

Footer is misplaced/not at the bottom at the following pages:

[search.php](#) Image [\(Click to View\)](#)

[myawards.php](#) Image [\(Click to View\)](#)

[forumdisplay.php](#) Image [\(Click to View\)](#)

Edit: It's all pages with not enough content to fill the screen.

Exalted - July 19, 2020, 10:03 am

I know I've read about the award count not being accurate on user profiles, and it has probably been mentioned countless times before. Still, I wanted to mention it because I just noticed that the award count is inaccurate on my profile. Last time I checked, it was accurate, but that's also when I still had the [Diamond lottery award](#).

(Jul 19, 2020 08:25 AM)xadamxk Wrote: [\[CITE\]](#) Give this guy the bug catcher award!

?

That'd be cool.

Exalted - *July 24, 2020, 4:04 am*

The notification that you get when you have found a new Hackúman has the wrong background color for the egg when the notification has been read (Yes, I am aware that it is an image).

I know it's nothing big, but it annoyed me when I saw it.

Current HEX: #333333

Correct HEX: #262626
