SKILL - RECRUITMENT

INTRODUCTION Skill is here to offer much more than just a lobby for gamers to connect and get into matches. Get ready for bi-weekly tournaments. With byte prize pools. There are no buy-ins as our spots are limited and too valuable to be purchased for "status" or a userbar. If you're in skill, it is by no accident. Everyone in skill will play some role in making sure that the current and next the tournament run as smoothly as possible. If you're interested in helping with running site wide tournaments then Skill is for you. If you're looking for a userbar and status then look else where.

ENTRY TO GROUP In order to be invited to Skill it is a REQUIREMENT that you fill the application out and submit as a reply on THIS thread. It is imperative that you do NOT send your application in the form of a private message. All applications are discussed within the leadership of Skill. We will not pass your application out. Consider it nulled and void if sent as a private message.

REQUIREMENTS Yes. There are some actual requirements in order to join Skill, a gaming group, insane. As previously stated, Skill is not a lounge. Skill is here to run and maintain tournaments.

1. An active member of Hackforums. You MUST be active in order to help with on going tournaments. Inactivity will see you out of the crew.
2. An understanding of how tournaments work. If you're going to be assisting with the success of Skill you must know what we're about. KNOW YOUR STUFF.
3. Be knowledgeable about games that we host. Do some homework, be willing, be open, to doing research. It will make managing tournaments smoother.
4. It would be nice to see some sort of tenure on Hackforums. This is a more lax requirement and is at the discretion of Skill leadership.
5. Communication: You will be expected to communicate during planning periods and on going tournaments.

We have continued playing as a group for a long time with or without a userbar. If you're looking for people with similar interests that you can game with, we are your people.

Can vouch for that the Discord that's used is fairly active. Though I don't play much of the games that have been played.

Good luck with recruitment :)

If you're mostly mature people (i assume you are?) and are also having a good time, i can be a good team mate.

Filling the formal application (the red color killed my eyes, i changed it, hope that doesn't disqualify me lol)

Xamarin - June 25, 2020, 3:56 am

1. What are your internet speeds(upload/download)?
50 Down, 2 UP. Low compared to some other guys that have posted here, but I still manage to play with ~70-80 ping and 150 FPS in all games I play, so I am not very mad about it.

2. Would you say that you're in good standing with Hackforums?
Yes, I would say I am.

3. Are you active in the gaming section?

I am as active as possible, not only in the gaming section, but also in the marketplace and the "Science, Religion, Philosophy, and Politics" section. I never overdo it with posting though, because I don't want to write LQ posts. My ideology in life is that quality comes before quantity ... and that also stands on forum postings as well.

4. What's your preferred system?
PC Exclusively.

5. Have you ever been in a tournament?

I have been in a CS:GO LAN Tournament on my country. Unfortunately the guys that we were matched against, were inside the TOP 10 players of my country, and also professional esports players ... so that didn't go very well for our team ??

6. What are your go-to competitive games?:

I would say PUBG, Valorant and CS:GO. But since its beta launched, I've been almost exclusively playing Valorant. No problem going back to any of the other games though, or even try new ones, if the company that I am playing with is right ?

Syome - June 25, 2020, 6:06 am

around the country and attended a few Apex Legends ones.

6. What are your go-to competitive games?: I'm on Valorant, Halo 5, Apex and some Warzone to keep me steady until Halo Infinite gets released.

6. What are your go-to competitive games?: CS:GO, League of Legends, VALORANT, Need for Speed: Heat right now.

I think I can be a great addition to the group as nothing has stopped me from gaming during my life. Since I was a very kid I couldn't let the mouse get out of my hands. Much of my childhood as well as adulthood is spent online and on games. I'd say I'm decent at most games I play and I always like the competitiveness as well as just a chill casual gamesession. Once I touch a new game I always try to learn as much about it as I can and play as good as I'm able to. I think I can learn a lot from you guys as well as you can learn from me and since I'm active on HackForums, Discord and so on then communication will be close and active.

Thanks for reading and kind regards,
Real
