Thread: [OSX compatible rat?](#)

Jeffrey Dahmer - May 23, 2020, 2:12 pm

Currently I'm on a MacBook Pro and I'm looking for a rat that I can open run on here and preferably spread to windows, linux, etc.

Any recommendations would be appreciated Thank you!

xloader - October 13, 2020, 2:56 am

xloader works on OSX and Windows you can PM me for more info.

VisualSoft - October 13, 2020, 12:44 pm

Netwire is perfect rat for this.

RustKernel - October 13, 2020, 12:50 pm

OSX is a specific version of MacOS but I'm assuming you're looking for a MacOS compatible rat, just giving you heads up.

Mitch - October 19, 2020, 8:12 am

Look for a python or java based RAT. theres tons for free on github

xVulnerable - October 20, 2020, 2:09 am

All java RATs should work on mac. Also Netwire.

kentex - December 7, 2020, 11:38 am

xloader pls dm me. i want to purchase

malichris - December 17, 2020, 4:51 am

Hello please can i start contract?

Fire_Star - December 26, 2020, 6:55 am

Netwire is cross-platform and decent

guardian - December 26, 2020, 7:06 am

Java, Python, Ruby and so on will work on Mac without any problems

I am not aware which RATs work with it, but Wine is a tool that lets you run lots of Windows Apps on Mac/Linux, maybe look into that

If you want to use a specific RAT really bad, use Virtualbox and install a virtualized Windows

okey1980 - December 29, 2020, 7:28 pm

Can you fix one month subscription and hpw much will it cost

I want you to fix everything including cpanel for hosting.

All i wanted is you setup eveything and send me raw file for sparming,

Do you have skype pr discord?

paulwhite231 - February 4, 2021, 4:13 pm

i am interested in your product and want to know if its FUD and do i need to use crypter for the product then lastly can i get disocount for one month liecence for windows

Cyb3rHydra - *February 5, 2021, 12:42 am*

Check out "Poshc2 & Mythic" on Github ! They should both run on MacOS
