IMO [XanPa](#) did a better job even though I think it's too big for a sig.

Really like the crow one, but it needs to be a bit smaller i guess.

Lotheramond - May 24, 2020, 6:35 am

The second one, made by XanPa is 35 MB and cannot be used as a signature.

Yin Yang - May 24, 2020, 6:46 am

I like the second one better as well. But the first one is good, no doubt.

Reducing a signature from 35 MB to under 500 KB is not possible.

XanPa is aware of this surely but didn't care to inform you.
