Sorry sir I'm hardly ever wrong, hackúman are new and I don't know much about them. Initially I thought they were stupid but egg lotteries have me thinking otherwise now.

Imitation is the highest form of flattery

This isn't necessarily an opinion, but more so a belief. I used to think that intelligence and being educated weren't separate. This is untrue, though. Individuals can be smart, but not educated; however, they can also be educated, but not very intelligent. Just because someone is educated, does not mean they are of superior intelligence. It just means they hold accolades from going through a system.

The police is your friend if you live in a developed country.

Sorry man, was researching the US police too much. But it makes sense, the US is not a developed country anyways.

I think problem is most people don't wanna admit they're addicted to weed. Maybe weed itself isn't

addictive, but you get addicted to the feeling

Where's my shite?" The first couple of days clean you'll have to eventually admit, yeah this is kind of addictive. I'm not going to lie, I was a little bit high strung when I stopped. The longer I stayed clean I started liking sobriety a lot more. Idk it's just part of growing up. I've smoked a handful of times in the last 8 years, but it's nothing that I would want to do on a regular basis. I'm pretty happy not smoking at all actually. I know it will be the same when I put these dumbass cigarettes down too. Those bad boys can be a pain in the arse.
