This looks really good!

Mind if I ask what you mean by private slotting? like x amount of users have to pay x amount a month?
Is it plausible for people to purchase for a day?

Only x amount of users per month. And no sorry monthly only as it is slotted. Day subs too much problems like helping support for x amount of users.

Hello, I wanted to just say that this is honestly great for Valorant, I paid \$50 for the month and it has been good for me, I am in iron atm and getting 30+ kills per game but of course you lose some because you are queued with average players, thanks again!!!!

xatt - December 30, 2020, 5:44 pm
Price for warzone (or other games)? I don't understand why I have to private message just to wait and hear back about the price. Just post it on the thread...
